

KNOWING THE FACTS WILL HELP US TO PROTECT OURSELVES AND OTHERS

Sometimes when we are afraid, we behave in a way that we would not normally do

▶ **FACT 1:**

- Most people who have the Coronavirus will only be mildly sick, like with the normal flu. Some people will not feel sick at all.
- A very small number of people will get very ill, and fewer people will die.
- People who get very ill or die almost always have other pre-existing illnesses that weaken their immune systems.

▶ **FACT 2:** Not everyone who has a temperature or feels ill has the Coronavirus.

▶ **FACT 3:** Not everyone who comes into contact with someone with the Coronavirus will get it. The more we protect ourselves by following good hygiene practices, the more we protect others.

BE KIND. TOGETHER WE CAN STOP CORONAVIRUS.
