

**ANYONE CAN GET THE
CORONAVIRUS, JUST LIKE
ANYONE CAN GET THE FLU.**

**Chances are you will soon (if you don't already)
know someone who is ill with the Coronavirus.**

They may be our friends, our family, our neighbours or our colleagues.
This might sound scary, but the good news is we don't have to be afraid of the
virus or of people who have the virus, because

We all have the power to keep ourselves and the ones we love

**SAFE AND
HEALTHY**

**All of us need to be mindful all of the time
– at home, at work, in our communities and when we travel.**

Fred

Who runs a shop
near our mine

**BE A
RESPONSIBLE
SHOPPER**

KEEP A SAFE DISTANCE

**Fred really
cares about
his customers,
and asks
them to:**

Keep a social distance of 1.5m

Be careful about what they touch, and only pick up what they want to buy

Wear a mask and sanitise their hands when entering the shop

Shop quickly and not stay for longer than they need to

Joe

Who drives a taxi
so that we can
move around

**BE A
RESPONSIBLE
COMMUTER**

HELP TO STOP THE SPREAD

**Joe cares
about the
safety of his
passengers
and always
asks them to:**

Wear a mask

Sanitise their hands before
entering the vehicle

Cough into their elbows

Observe the correct social distance
when seated in the vehicle

Ma Joyce

Who has her hands full with three kids at home

**PROTECT
YOUR
FAMILY**

WASH YOUR HANDS

Ma Joyce keeps her family safe and healthy by:

Making sure they always wash their hands

They always wear a mask when they leave the house

Making sure that their face masks are washed every day

Reminding them not to touch their mouth, nose, eyes or any part of their face

Cleaning and sanitising all surfaces in the house

**WE ALL HAVE THE
POWER TO KEEP
OURSELVES AND THE
ONES WE LOVE SAFE
FROM CORONAVIRUS**

Dr Wilson

**Who tends to all
our needs**

KNOW THE FACTS

**Not everyone who gets the Coronavirus will become very ill,
some people won't feel sick at all.**

*Most people will fully recover. We must take care to protect people
over 60 and those with underlying health conditions.*

**Dr Wilson asks her
patients from the
mine and surrounding
communities to check
themselves for the
following symptoms:**

A high fever

A dry, persistent cough

Sore throat

Aches or pains

Difficulty breathing

Sarah

Who is trying to catch up on her learning

**KNOWLEDGE
IS POWER**

WEAR A MASK

Sarah knows that there are many things she can do to keep herself, her classmates and her teacher safe and healthy.

She protects herself and others by:

Always wearing a mask at school

Regularly washing or sanitising her hands and reminding her friends to do the same

Never sharing food or drinks

Keeping a social distance of 1.5m even on the playground

Not touching or hugging her friends or teacher

Not touching her face

Noah & Omar

Who work at
AngloGold Ashanti

**TOGETHER WE
CAN STAY SAFE
AND HEALTHY**

WE HAVE THE POWER

Noah and Omar know that safety and health must always be the first priority. All of us have the power to protect ourselves and others by being aware all of the time - at work, at home and in the community.

They lead by example and always remind their teams to:

Wear a mask and all the PPE the mine provides

Wash or sanitise their hands regularly

Maintain a social distance of 1.5m as much as possible

Check how they feel every day before going to work and to let their supervisor know if they aren't feeling well
